

Code Review Report

Language: java | Review mode: hybrid | Model: llama-3.3-70b-versatile | Generated: 2026-08-13 17:26 UTC

Overall Assessment

The code review has identified 7 findings with a risk score of 16, indicating areas that require attention to improve code quality and maintainability.

Merge readiness: Not Ready

Code health: 36/100

Findings Summary

Total findings: 7

Risk score: 16

Severity breakdown: Low 0, Medium 5, High 2, Critical 0

Type	Severity	Line	Message	Recommendation
Long Parameter List	Medium	2	Method has 6 parameters.	Reduce parameter count by grouping related inputs into a value object.
Long Method	Medium	2	Method spans 22 lines.	Split the method into smaller helpers with a single responsibility.
Deep Nesting	Medium	2	Method contains 6 nested control-flow statements.	Flatten the control flow using guard clauses or extracted methods.
Large Class	Medium	1	Class declares 17 methods.	Split the class into smaller cohesive components.
Long Parameter List	High	12	Too many parameters.	Group related parameters.
Deep Nesting	High	20	Complex nested blocks.	Extract helper methods.
Large Class	Medium	2	Class has too many responsibilities.	Split class by domain concern.

Remediation Roadmap

Finding	Severity	Impact	Suggested Action
Long Parameter List	High	Improves code readability and maintainability	Group related parameters into a single object
Deep Nesting	High	Reduces complexity and improves readability	Extract helper methods to reduce nesting
Long Parameter List	Medium	Improves code readability and maintainability	Reduce parameter count by grouping related inputs into a value object
Long Method	Medium	Improves readability and maintainability	Split the method into smaller helpers with a single responsibility
Deep Nesting	Medium	Improves code readability and maintainability	Flatten the control flow using guard clauses or extracted methods

Finding	Severity	Impact	Suggested Action
Large Class	Medium	Improves maintainability, readability, and reusability	Split the class into smaller cohesive components
Large Class	Medium	Improves maintainability, readability, and follows the Single Responsibility Principle (SRP)	Split the class into OrderProcessor and Helper classes

Source Code Snapshot

```

public class BadCode {
public int processOrder(int a, int b, int c, int d, int e, int f) {
int result = 0;
if (a > 10) {
result += a;
if (b > 10) {
result += b;
if (c > 10) {
result += c;
if (d > 10) {
result += d;
if (e > 10) {
result += e;
if (f > 10) {
result += f;
}
}
}
}
}
return result;
}
